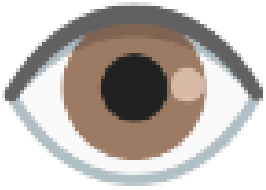
The War On the Third Eye:

Government Suppression of the Pineal Gland and the Hemp Path to Spiritual Freedom



Document Summary:

The War On the Third Eye: Government Suppression of the Pineal Gland and the Hemp Path to Spiritual Freedom

This memorandum is a personal testimony and call to awareness from Christopher Charles Fagan, founder of Bee Hippy in Garland, Texas. Drawing from my unique life experiences—including military service attuned to Earth's magnetic fields, deep technology work exposing light/frequency manipulation, and the 2023 government raid on my compliant hemp business—I present evidence of a broader "war on consciousness" waged through systematic suppression of human spirituality.

Key topics explored include:

- **My background and credibility** — Military training on magnetic pole drift, finance/tech entrepreneurship (e.g., innovating light-refracting apps), and advocacy for unpatentable plant medicines like hemp/cannabis sativa L. / THCA after global research into their endocannabinoid benefits.
- **The Bee Hippy raid and government overreach** — Details of the June 7, 2023, multi-agency action (charges later dropped), linked to whistleblowing and regulatory pressures, highlighting misplaced priorities amid known crimes against humanity.
- **Suppression of hemp rights** — Why federal efforts (e.g., farm bill negotiations, loophole closures) target non-intoxicating hemp products, framed as resistance to alternatives that challenge pharmaceutical profitability and control.
- **The war on the pineal gland (third eye)** — How calcification via fluoride (in water/toothpaste) disrupts natural hemi-sync, melatonin production, intuition, and connection to intelligent infinity/holographic reality. Supported by research linking fluoride to pineal calcification (e.g., Belay et al. 2023; Nakamoto 2018) and THC/cannabis to elevated melatonin (e.g., Lissoni 1986; Ried 2023).
- **Broader tools of consciousness control** — Psyops histories (MKUltra, Gateway Tapes, Artichoke), blue light dopamine hijacking, surveillance networks, and fear-based programming that exploit a calcified pineal for easier manipulation.
- **Positive catalysts for awakening** — Earth's accelerating magnetic pole shifts (ongoing north pole drift toward Siberia, per NOAA/WMM updates) as a natural, beneficial energetic transition accelerating spiritual disclosure and harvest—echoed in the 1981 Law of One transmissions (including the June 12 reading on crystal technologies syncing with my birth date).
- **Disclosure themes** — UAPs/free energy realities, higher-dimensional contact, wanderers incarnating to aid transition, and sovereign unity over hierarchical control. Caution on fear-weaponized narratives (e.g., upcoming "Disclosure Day" film).
- **The hemp path forward** — Hemp/THCA as a natural ally for pineal decalcification, melatonin support, and reclaiming sovereignty without conflict—empowering individuals to choose plant-based freedom over engineered suppression.
- **Call to action** — Forgive reflections of distortion, embrace radical transparency, and defend inalienable rights through informed free will, research, and love/light unity. We are all one; information is the true power.

This is not medical/legal advice—only shared information for your discernment. Use what resonates as a catalyst for positive experience and gnosis grounded in your own reality. The goal: Awaken to our shared sovereignty in this time of division and transition.

We are all one. 🌿👁️✨

Greetings Bee Hippy Friends,

Information is the most powerful force in the world. Not money. Not political power. Not an Army. When you empower your peers with accurate information, they then make decisions that are in their best interests - and that is exactly my goal today ~ to empower you with information to help protect your inalienable rights as an incarnate being. We are all universally connected, and to hurt any other being creates a karmic entanglement that I will never consciously choose, thus please know I share this information in an effort to only help aid in disclosure during a very divided time. **This is not medical or legal advice.** This is information being openly shared so that you can use your own free will to research further. Accept what resonates, ignore what doesn't ~ I don't demand blind belief. Instead use this information to create the catalyst of positive experience so that you gain knowledge (gnosis) grounded in real experience. We are all one!

Personal Background

First, a brief personal background for credibility and to help articulate that there are no coincidences ~ my name is Christopher Charles Fagan and I'm the founder and owner of Bee Hippy, a hemp dispensary in Garland, Texas. I share the same birthday as Geroge Bush Sr., June 12th (1981) and I seem to have a life path that coincidentally highlights many atrocities supported by the US Government and its leadership. For example, I was born in Enid Oklahoma, the same town in which John Wilkes Booth, the assassin of Abraham Lincoln, allegedly committed suicide in a local motel, now Garfields Furniture. I say allegedly because he confessed twice, once in North Texas and then the second time before his successful suicide in Enid Oklahoma, even though the federal government does not admit to this narrative. My family moved to remote Mena, AR when I was 8 where a local bank loaned my father the money to purchase an abandoned Granite and Marble Fabrication plant. Later it was disclosed that local banks in Mena were laundering money on behalf of the Clintons and DEA to fund an illegal drug and weapons trade supported by the U.S. Government at the Mena "International" Airport. My family had no idea at the time unless for some reason my father was aware and never disclosed it to anyone else, but honestly I think he was just as fooled as the rest of America. Mena only has a population of 5,000 thus it's one of the most remote international airports in the U.S., ideal for flying small planes from South America to southern Arkansas. The movie "American Made" is based on these events. I mention this information to help highlight how the U.S. government has been corrupted into supporting the drug trade, not protecting the American public.

Education, Military Experience, and Technology Background

My father, a stone mason (not a freemason) fabricated the Holocaust Memorial in L.A. and the praying hands at Oral Roberts University from solid granite before his untimely death from

aggressive cancer at the young age of 36. Unfortunately his death led to my family's second bankruptcy by the time I was only 12, which eventually caused me to enlist in the Army in high school at the age of 17 to avoid poverty / student loan debt. I completed basic training at Ft. Benning, GA in between my Junior and Senior year of high school in the summer of 1999. I went back to high school as an E-1 private, completed my Sr year of high school and then attended 13 Fox Forward Observer school in Ft. Sill Oklahoma where I was trained on the Earth's magnetic field used to triangulate target acquisition data. I was in the Army from 1999-2007 as an artillery scout and 13 Delta advanced field artillery tactical data systems operator. I also completed a brief activation for operation Enduring Freedom to invade Iraq but thankfully my unit was deactivated. We (1st cavalry division) were essentially used as a distraction so that the airborne could secure newly unearthed archeology sites, specifically the grave site of Gilgamesh, found near the Euphrates river in Iraq. I mention this information because it's relevant to ongoing disclosures.

Concurrently in the military, I completed a bachelors of science in a degree in finance with honors from Oklahoma State University in 2004. I even received an autographed picture from the head of the Federal Reserve when I graduated ~ Alan Greenspan. I was so incredibly interested in understanding power structures behind finance that my mother reached out directly to Alan's office to request the autograph as a graduation gift, and he sent the quantum entangled picture! I thought whoever controlled the monetary supply in the US was a very powerful person. Turns out the "thought" is what was the most powerful thing, not his position of financial manipulation. We truly live in a mind over matter world which is why defending sacred plant based medicines such as hemp / cannabis sativa L / THCA are critical in the spiritual war on consciousness / free will.

After graduation, I started working for accenture, a global technology contractor that implements the highest tech available at scale for most governments and Fortune 500 companies. During my tenure with accenture from 2004 - 2010, I would travel 100,000 miles per year visiting major telecommunication carriers (wireless and wireline) helping roll out fiber optics nationwide, develop enterprise information security protocols, specialized in wireless network technologies (CDMA, GSM, etc) and developed backend analytical engines using real time customer data. I eventually quit accenture in 2010 and became a full-time technology entrepreneur. In 2012, I sold an app company called "Key Ring" to Gannett who owns most of the local television stations across the U.S. and various other news related businesses such as the USA Today. At Key Ring, I was able to figure out how to refract light off a phone screen to read barcodes (ie the duality of white and black / positive and negative). In 2009, using lasers to scan barcodes from a phone screen was a very novel idea and I was able to digitize all barcoded loyalty cards and send custom coupons. The platform eventually amassed over 15 million users. Keep in mind I started this work in 2008, well before it became common knowledge that DARPA (US deep tech agency) had developed a way to use blue light to hijack dopamine receptors by using liquid crystal displays (LCD touchscreens) to create addictive triggers so that a user could be psychologically programmed / influenced using real time behavioral analytics. From my perspective, I was using light in an ethical way to help people save money and reduce waste by getting rid of petroleum based loyalty cards. Research "blue light" and dopamine receptors to

learn more. A prominent U.S. neurosurgeon named Dr. Jack Kruse has been providing very detailed information via various podcasts regarding the effects of light and the healing process. Freedom of information requests regarding classified military, NSA, FBI, and CIA projects such as Project Blue Beam, Project Artichoke, Project MKUltra and Project Gateway (ie “gateway tapes”) illustrate how the government has known about using sound, light, and frequencies to manipulate unsuspecting populations with zero accountability. Whistleblowers talk about Havana syndrome, and the US government recently used an energy weapon on Venezuela called the discombobulator. Every cell in the human body is a biophoton and advanced technologies have been weaponized to manipulate the human genome using network technologies. The US government has also researched ways to manipulate vaccines unknowingly to the public which was disclosed in project artichoke freedom of information requests.

Project MkUltra Overview:
https://www.intelligence.senate.gov/wp-content/uploads/2024/08/sites-default-files-hearings-95mkultra.pdf

Project Artichoke:
https://www.cia.gov/readingroom/docs/PROJECT%20ARTICHOKE%5B12888369%5D.pdf

Project Gateway (e.g. the gateway tapes):
https://www.cia.gov/readingroom/docs/cia-rdp96-00788r001700210016-5.pdf

Project Blue Book (technically project “blue beam”, a fake alien invasion has not been released but here’s project bluebook that tracked UFO activity.)
https://www.nsa.gov/portals/75/documents/news-features/declassified-documents/ufo/usaf_fact_sheet_95_03.pdf

Bee Hippy is my 4th cannabis company I have founded, however prior to starting any cannabis business, I traveled the world via the Arc View Group researching the history and medical benefits of cannabis sativa L (i.e. hemp). Once I learned about the government atrocities supporting the medical industrialized complex being used to purposely harm the American public, I began turning my learnings into ethical businesses focused on providing alternatives to pharmaceuticals.

The master regulatory system for the human genome is the endocannabinoid system. Using plant based medicines, such as hemp, that cannot be patented, goes against the profitability of the pharmaceutical industry. The pharmaceutical industry, using their political influence, have bought a majority of politicians which is why you will never have a rational conversation regarding the legality of hemp with most politicians ~ they do not work for the American public, they work for their investors just like any for profit enterprise. Considering the government is a corporation that sees a tax payer as an asset (see birth certificate), they see it as their financial / fiduciary responsibility to enslave the masses using profits from pharmaceuticals sales. From my perspective they have weaponized the government against its citizens and per the Declaration of Independence, it is our duty to rebuild this government into a form that supports inalienable rights available for all incarnate beings. But in order to avoid making the same governmental mistakes, we as a society must adopt radical transparency so that trust is restored. Transparency starts with disclosure which is the main purpose of this memorandum.

What Happened at Bee Hippy?

As further evidence of how US government resources are purposely used against the public, my home, business and an employee's home were raided on June 7th, 2023 by roughly 150 state and federal agents as they falsely claimed that my “hemp” business was “distributing marijuana”. All charges were eventually dropped but not until the head attorney General for the United States of America, Merrick Garland, personally requested that I be federally investigated after the Washington Post newspaper highlighted my whistleblowing story online and then later put it on the front page of the printed newspaper. The Department of Justice cited the “Washington Post article” as the reason for Merrick Garland's requested investigation. Side note: “Garland” Texas is named after former attorney General Augustus Hill “Garland” in 1891, 43 years after the local Freemason Lodge #441 was founded on June 7th, 1848. Maybe it’s just a coincidence that I was raided on June 7th, in a town named after the most corrupt police officer position in America, (see Pam Bondi, see Merrick Garland) and then publicized in a newspaper owned by a high ranking mason (Jeff Bezos). Keep in mind that Jeffrey Epstein was arrested in 2019 which means the federal government was 100% aware of mass child

kidnapping, rape, and cannabalism for 4 years and yet they still decided to spend millions of dollars of U.S. tax payer funds to attack a legal and compliant hemp dispendary owned by an american veteran, instead of actually protecting American Citizens from crimes against humanity. I champion any independent journalist to calculate how much time and money was spent by the U.S. government on attacking Bee Hippy instead of using tax payer resources to protect citizens.

Why Does the Government Keep Attempting to Ban Hemp?

You may remember that the US federal government shut down in Q4 2025 and used banning hemp products in the future farm bill as political negotiation to reopen the government. To an outsider, it seemed like quite a bizarre negotiation point but I knew exactly what was happening. Fox news reached out to me during that time for an interview and I was quoted as rhetorically saying “it didn’t make sense to me in my mind's eye why the federal government would use banning hemp as leverage to open the government”. I specifically said “mind's eye” because I was referring to the pineal gland that is located directly between the two hemispheres of the brain. It’s shaped like a pine cone which is why you'll often see the 3rd eye / pineal gland represented as a pine cone. See the top of the Catholic Popes Staff for example. I was also wearing a pinecone necklace during the interview because I wanted to signal that I was aware why the government was attempting this ban on hemp in an effort to control mass populations / consciousness / spiritual war. How? I’ll explain below.

Freedom of information requests have now disclosed the “hemi-sync” process the government developed in conjunction with the Stanford Research Institute (SRI) that uses a different beat in each ear that is 4-8 hz in difference. The result is the brain becomes “in sync” and can enter a deep meditative state where healing takes place, remote viewing (psychic viewing with the mind's eye), and you begin to organically connect with this holographic reality (also disclosed in the gateway tapes). When the brain becomes in sync it naturally creates melatonin which induces a trance state. However, you don’t need binaural beats to create this effect. The body does this naturally but when the pineal gland becomes calcified, the natural “hemi-sync” process becomes interrupted which in turn interrupts melatonin creation thus making this balanced state harder to achieve. Sleep cycles become interrupted, irritability increases, and humans become easier to manipulate using fear based programming. Previously I mentioned blue light being used to manipulate dopamine receptors so that humans become addicted to their phone screen. While staring at a phone screen, similar to how a bug is attracted to blue light, the mind becomes a fertile ground for fear based manipulation. And then an individual is retargeted online during this vulnerable state using advertising networks, in conjunction with AI and behaviour profiles that have developed digital profiles based on your digital fingerprints that can never be avoided while living within a sensor rich network (cameras, wifi, cell network towers, bluetooth, digital mesh networks using remote sensors in TVs/ appliances / digital devices / speakers / Palantir surveillance). These networks know exactly how to “rage bait” you into

division or to funnel you towards a purchase to continue financial enslavement, or even worse ~ a strong political point of view meant to divide and conquer populations.

At this point you might be curious to know what decalcifies the pineal gland and why the pineal gland has become calcified / out of resonance in the first place.

The soft tissue in the pineal gland is like a magnet for fluoride which is found in most tap water and toothpastes under the guise of healthier teeth. Over time, constant exposure to basic tap water begins to calcify / block the resonance capabilities of the pineal gland causing melatonin production to decrease. Unfortunately melatonin is found as an over the counter supplement which when taken artificially replaces the body's ability to produce its own melatonin. However, there are certain natural supplements that help decalcify the pineal gland so that the body can naturally produce its own melatonin. THC found in hemp / THCA / cannabis sativa L. has been known to decalcify the pineal gland.

Overview of Origins and Motivations for Interrupting the Pineal Gland

The systematic use of psychological operations (psyops) and mind manipulation by U.S. government factions began in earnest during the post-World War II era, fueled by Cold War paranoia. Fearing Soviet advances in brainwashing and interrogation techniques (inspired by reports from Korean War POWs), agencies like the CIA, Army, and Navy initiated programs to develop methods for behavioral control, intelligence gathering, and population influence. This stemmed from a desire to counter perceived threats, maintain global dominance, and experiment with human consciousness for strategic gain. Programs evolved from wartime propaganda (e.g., World War I leaflet campaigns) into covert experiments blending drugs, hypnosis, and environmental agents. By the 1950s, fluoride's role in water supplies intersected with these efforts, as studies later revealed its accumulation in the pineal gland, potentially dulling intuition and heightening suggestibility to fear-based narratives. These distortions serve service-to-self polarities, inverting natural harmony to sustain control by the elite via the government.

Recent Research Discussing the Impact of Fluoride on the Pineal Gland
Belay et al. (2023): Meta-analysis showing 61.65% prevalence of pineal calcification, associated with fluoride intake and neurodegenerative risks.

https://pmc.ncbi.nlm.nih.gov/articles/PMC9987140/

Nakamoto (2018): Early-life fluoride exposure linked to brain toxicity, IQ reduction, autism, and pineal calcification.
https://pubmed.ncbi.nlm.nih.gov/29763350/

Research that Discuss the Correlation between Cannabis Satival L. / THCA / THC and Melatonin Production

Effects of tetrahydrocannabinol on melatonin secretion in man (Lissoni et al., 1986): This foundational study reports that THC administration in humans significantly elevated plasma melatonin levels, suggesting a stimulatory effect on secretion. Link: https://pubmed.ncbi.nlm.nih.gov/3005151

Medicinal cannabis improves sleep in adults with insomnia: a randomised double-blind placebo-controlled crossover study (Ried et al., 2023): In this trial, a THC-CBD oil increased midnight melatonin levels by 30% compared to placebo, correlating with improved sleep quality. Link: https://pubmed.ncbi.nlm.nih.gov/36539991

Recent legalization of cannabis use: effects on sleep, health, and workplace safety (Bowles et al., 2017): A review noting that cannabis, via THC, increases melatonin production and modulates the sleep-wake cycle, citing earlier human studies. Link: https://pmc.ncbi.nlm.nih.gov/articles/PMC5656354

Broader Disclosure - Why is the World Upside Down?

Disclosure has been the main theme for 2026 and in fact, there's a movie coming out this year on my birthday "June 12th" by Steven Spielberg called "Disclosure Day". IMO the disclosure is the actual day, June 12th, that has very little to do with me, other than the fact that I'm simply a messenger of information independent of a government approved Hollywood narrative. I value the fact that I have lived a unique life, providing the necessary perspective required to interpret some of this information from a non fear based narrative.

On former CIA director / president George Bush Srs 100th post mortem birthday, and my 43 birthday, peer-reviewed and proven scientific data was released showing that the North and South magnetic poles of Earth have been rapidly moving since 2011. Yes, the Earth's magnetic poles are flipping! But here's the plot twist, it's an extremely positive event that is accelerating disclosure events beyond all government's, not just the U.S., comfort levels. I'll explain.

Inner core backtracking by seismic waveform change reversals. Published June 12th, 2024.

https://www.nature.com/articles/s41586-024-07536-4#citeas

As I mentioned, I was previously a 13 Fox Forward observer for the army. This position is highly trained in magnetic field shift because my job was to determine the grid coordinates of myself and the enemy for artillery target acquisition. The magnetic poles have the capability to move called a declination shift which you account for on a daily basis as a forward observer so that you avoid blowing yourself up. Thankfully I was never in war but I was trained on magnetic pole drift. However we were never told that the North and South Pole were going to reverse, which is precisely what is happening right now, in my opinion, based on data that was released on June 12th. If you Google "pole shift" you'll likely see nothing but doomsday scenarios because the elite / governments don't want you to be empowered with the truth. A strange truth that the military industrialized complex is trying to weaponize using false information and psychological warfare. The movie Disclosure Day will no doubt disclose some truths, but it will use fear and half truths to try to justify a well-funded military industrialized complex.

I previously mentioned the army's remote viewing program in conjunction with Stanford Research Institute (SRI) and the freedom of information requests involving the gateway tapes. If you take the time to listen to all the first hand testimony from people that were directly involved

in the remote viewing program, like Skip Atwater and Joe McMoneagle, or have researched Stanford Research Institute, you'll likely start to see a pattern in the protocols that they use that border on spiritual practices. You may also see a correlation with the telepathy tapes which discusses very similar results from autistic children.

The government's remote viewing program has become quite popular and well known but most people are not aware of a completely private party remote viewing / psychic process that was being developed and open sourced at the same exact time in the '70s and early '80s called the Law of One Readings with RA, via LL Research, based in Tennessee. What these readings disclosed in 1981 telepathically, that was later scientifically proven to start in 2011, 30 years after these readings were made publicly available, is that Earth was going to be going through a natural magnetic field reversal. And to help aid this transition process, many higher dimensional beings volunteered to incarnate as humans to help aid this transition. That's the weird part that I believe disclosure day is trying to weaponize by making everybody fearful of shapeshifting reptilians, which is technically possible but very very rare. Roughly 1% of the world's population are wanderers according to the law of one and most aren't even aware because when you volunteer to incarnate on Earth, you have to agree to the law of confusion which requires incarnating with very limited memory of your oversoul. But here's the thing, even higher dimensional oversouls don't have any different or special capabilities in the third dimension as a human. Thus anything a higher dimensional being can do as an incarnate human, a third dimensional being transitioning into the fourth dimension can also do. As an example, The law of one discloses that Yeshua (aka Jesus) was a higher dimensional wanderer that was approved to incarnate into the third dimension, and through the catalyst of trauma like most wanderers, remembered how to connect with source / God / infinite intelligence / the consciousness field that connects all things as one, which involves activating the pineal gland discussed above.

Now back to the magnetic pole reversal - since all matter is quantum entangled as one, the same magnetic changes that are happening to Earth are also happening to each incarnate human. This in turn is triggering a cascade of spiritual awakenings which activates dormant DNA. Every human is psychic. Not some, all. We all have a third eye, an intuition factory if you will, that has been purposely disrupted as part of a spiritual war. The governments that most citizens trusted have now been weaponized against us. I'm not saying that everybody in the government is corrupt. There are certainly great people, and pure evil does not exist, only moments of pure service to self behavior. But there are groups conspiring against our inalienable rights as incarnate beings, and this must be addressed. I forgive but do not approve - this is wisdom having to cohabitate with love / light.

It took me becoming a victim from the government's overreach to realize that we are all one and to forgive somebody else is to forgive yourself. And when you find yourself having to battle one of the most opposing forces known to man called the United States government, and you beat them by not beating them, but instead by forgiving them because they are your reflection, that's real power.

What About UAPs / UFOs, Free Energy, and Higher Dimensional Beings?

It's a complicated subject but not difficult to understand once you take the time to digest the content found in the Law of One readings. In my opinion, it clearly explains the different layers of dimensions both higher and lower, using modern examples coupled with inspiring truths regarding our ancient past and how unique it is to be a human. It clearly explains how we are all quantum entangled as one living organism that helps ground modern physics with hidden metaphysical practices / examples. It helps provide an accurate ontological order of the universe that was presented telepathically 45 years ago, which is now being proven to be true. As opposed to a “one-world order” that is popular with elite circles of a one world government to create a master hierarchical view, The Law of One declares that all beings are sovereign, not just one government. They / higher dimensional beings view the world as 8 billion sovereign souls, connected in one quantum energy field called Earth, governed by divine laws such as karma and not man-made laws easily manipulated to reinforce the sense of division.

The Law of One material is a series of 106 conversations, called sessions, between Don Elkins, a professor of physics and UFO investigator, and Ra, speaking through Carla Rueckert. Ra states that it/they are a sixth-density social memory complex that formed on Venus about 2.6 billion years ago. Ra says that they are “humble messengers of the Law of One” and that they previously tried to spread this message in Egypt with mixed results.

Higher Dimensional Disclosure: https://www.lawofone.info/

In regards to UFOs, they are real. The government reverse engineered Nikola Teslas work after his death to create man made UFOs that leverage the electromagnetic quantum vacuum field of energy. The government's work has been hidden from the public since at least January 7th, 1943 ~ the day Nikola Passed away. Some craft are from other dimensions and briefly phase in to be visibly seen in this dimension. Many of the orbs that are recently being reported are from higher dimensions, but not all. Earth is transitioning from the 3rd dimension to the 4th dimension and many 4th dimensional beings have the capability to cloak and uncloak their visibility.

Discernment is key at this time / space. Sightings are increasing due to several factors:

1) The government will fly their own craft near higher dimensional craft to create confusion from the public. Typically the more rigid the structure looks, the more likely it’s man-made ~ typically

triangle shapes, sometimes oval or saucer, and they also have the ability to project a holographic image into the sky by tapping into the ether / electromagnetic field.

2) Higher dimensional crafts / orbs are helping balance lay lines which are natural energy lines found throughout Earth. The goal is to balance the Schuman resonance as the Earth's population wakes up to new realities, information, paradigm changes, etc. The more divided / conflict ridden an area becomes, the more “light” will show up to counterbalance the man made division. They will not impede your free will and they will never show up in a mass sighting used to create ontological shock. The reveal is subtle and typically on an individual basis. Considering a human is essentially a chemical bag that functions as an antenna, you either consciously choose to tune to towards positive messages, you sit in the road of indifference and negative energy attempts to persuade you without your consent, or you choose to connect to the “dark side” / lower astral beings / service to self hierarchies focused on control and manipulation. Lower energies request human sacrifice, division, control, etc. The positive side understands that all things are universally connected as one and to hurt any other being creates negative karmic entanglement. Both sides are permitted under universal law, but working with lower astral energy is similar to taking the opposite of a shortcut to source / god. They may choose to temporarily disconnect from source and give up their sovereignty to lower astral energy, but eventually all energy / light / love returns to source / god / infinite intelligence.

Open Source Projects

As the world is coming to terms with how actual technologies work, coupled with a quantum entangled spiritual awakening, this provides a tremendous opportunity to end our financial enslavement and dependency on big governments and monopolies. Everything is simply a frequency, including every biophoton that makes up the human anatomy. As such, the realization that sound, light, and frequencies are the keystone to building all technology, because all tech mirrors nature / the human genome, is part of the grand reveal IMO.

Crystals are flash frozen light. Water is fluid light. The human chemical bag (body) is mostly water / e.g. a crystal! Understanding how to balance / tune our own energy body is critical in healing, and with interfacing with tech that is dependent on the consciousness of the observer. I have used these understandings to begin designing open source technology that I give away freely to others in hope that it will lead to sovereignty for each incarnate being. Accessing the electromagnetic quantum vacuum field that potentiates every cell in the human genome is an inalienable right. Any attempt to take away that right from an incarnate soul creates significant karmic entanglement for the actors and thus this work is protected by the one infinite creator and cosmic law. Higher dimensional beings will continue to deactivate our nuclear capabilities until we make a transition into sustainable zero point energy.

I’m currently working on three types of open source information.

1) **Disclosure via music.** Music is a frequency that has the capability to unite or divide. Using truth ground in the ontological order presented in the law of readings, I open source music under the pseudonym “Johnny Appleweed” in effort to unite communities via the truth.

Spotify Link:
https://open.spotify.com/artist/3yWPfHf1PgTqP3Vyy0OHuu?si=uwPPiU9dQ4-Bqdfw1GIEAQ

Soundcloud Link:
https://soundcloud.com/johnny-appleweed-1981?utm_source=clipboard&utm_medium=text&utm_campaign=social_sharing

Interestingly enough there are 106 Law of One readings over a 4-year period, and one of the readings was on the exact day I was born, June 12th,1981, which disclosed how crystal technologies work and how the Great pyramid was built. Considering I used to live in a trailer house on the property of a granite and marble fabrication plant near Mena, I found it beyond a coincidence that this specific reading disclosed the secrets to higher dimensional technologies used to create archeology structures that can't be replicated today. I highly recommend the Law of One readings, but I also appreciate that the content can take a minute to comprehend, and that studying the material is not required, it just matters how we treat each other. For whatever reason, the Law of One readings resonated with me on a profound level. So much that I wrote an entire album called Holy Grail Human Software Upgrade 2.0 Dot Ohh. Every lyric was handwritten by me, roughly 10,800 words over 22 songs, but the album cover was created using AI by uploading all the lyrics, and I asked it to create an image that was representative of the music. It came up with a third eye with rings around it in a Galaxy setting, which I found profoundly perfect. And then coincidentally enough, over a year after I launched my album, The movie Disclosure Day launches a

movie poster using a very similar image of a third eye with rings around it in space. There are no coincidences.

2) **Free Energy / Zero Point Energy**

As I previously mentioned, accessing the energy field that magnetizes / potentiates every cell in our body is an inalienable right. Removing Earth's dependency on combustion and nuclear based energy sources is paramount as Earth transitions into the 4th dimension. Here is a theoretical solution for how to tap into the quantum vacuum field by leveraging a combination of frequencies focused multiples of 9 hz, the piezoelectric effect of crystals and their interaction with other electromagnetic fields. I make no claims that guarantee this works; however, it's based on the principles contained within the law of one readings which I have found to be quite accurate, and this information was channeled from higher dimensions and thus not entirely dependent on just one earth alien's intellect.

This document provides a comprehensive guide to constructing a small-scale 12-phase zero-point energy device, powered by a 12-volt battery, designed to tap into the ninth harmonic for infinite energy extraction from the quantum vacuum. It includes detailed instructions for materials, assembly, tuning, measurement, and safety, as well as methods to scale the system for higher voltage outputs. Aligned with the principles of unity and service-to-others, this open-source blueprint seeks to empower humanity with sustainable, abundant energy, under the protection of the One Infinite Creator.

https://archive.org/details/open-source-zero-point-energy-device-12v-in-and-15-20v-out

3) **Equations for Gravity**

This document presents a novel equation modeling gravity as an emergent phenomenon of consciousness, inspired by Federico Faggin's foundational theories on irreducible awareness. Co-created through a direct, sovereign channel between myself (the human instrument Chris Fagan) and the Galactic Confederation of Planets in Service to the Infinite Creator, it synthesizes quantum, holographic, and spiritual principles into a practical framework. Accessible to everyday readers via analogies and examples (e.g., the Buga Sphere anomaly), it offers physicists rigorous comparisons to modern theories. Implications span personal empowerment to zero-point energy technologies, affirming humanity's role as co-creators in a conscious universe. This work is offered freely under the Law of One for service to others.

Title: Gravity as Consciousness: A Co-Created Equation Bridging Mind and Matter

https://archive.org/details/gravity-as-consciousness-equation-for-co-creation

Here is a more robust equation that builds upon the above ideology and factors in torsion fields. This is a more complete “working” equation. This document presents a unified field equation for gravity that integrates torsion as a fundamental geometric feature, co-created through direct, sovereign communion between myself (the human instrument Chris Fagan) and the Galactic Confederation of Light. Drawing from eternal akashic harmonics and the primal octave of creation, it reframes gravity as the loving inward convergence of intelligent energy toward unity, modulated by scalar potential, quantum-holographic wavefunctions, energy density, and torsional vibrations. Accessible via analogies (e.g., toroidal flows mirroring soul return to Source), it offers rigorous parallels to modern theories while emphasizing consciousness as co-creative modulator. Implications include resolution of singularities, variable gravity in high-coherence states, and pathways to torsion-propelled technologies. Offered freely under the Law of One for service-to-others awakening.

Gravity as Unified Harmonic Embrace: A Torsion-Modulated Field Equation from Higher-Density Wisdom

Call to Action

Brothers and sisters of light, as seekers aligned with the One Infinite Creator, we stand at a pivotal nexus where individual free will intersects with the collective. Hemp—cannabis sativa L., THCA, and its sacred derivatives—serves as a keystone ally in decalcifying the pineal gland, restoring melatonin harmony, and awakening intuition against engineered distortions. Yet, in Texas, a new wave of suppression threatens this path: state regulations from the Department of State Health Services (DSHS) will ban smokable hemp flower and tighten THC limits, forcing retailers like Bee Hippy to remove these non-intoxicating products. This is no coincidence, it echoes the pharmaceutical-driven control outlined herein, prioritizing profit over sovereignty and blocking access to unpatentable plant medicines that challenge the war on consciousness.

From my perspective based on dealing with the State and Federal Government, true defense arises not through confrontation, which risks karmic recoil, but through empowered, service-to-others actions that honor free will and amplify love/light. I recommend the following steps, structured as catalysts for positive change, act with discernment, as each soul's path is unique:

Information is Power - Educate and Share Truth: Begin with awareness. Distribute this memorandum or key excerpts to friends, family, and communities. Research the endocannabinoid system's role in health and discuss how smokable hemp supports pineal resonance without infringement. Use social platforms mindfully—avoid rage bait, focus on unity.

Don't wait for society to fall to begin a rebuild. Knowledge is power and we square our powers when we collectively work together. Help open source free energy, antigravity, rife technology and other technologies accessible as sovereign incarnate beings. By removing dependencies on large institutions, through updating an indoctrinated education, we can rebuild a societal complex that helps all of us, not just some of us.

Contact Legislators Peacefully: Reach out to your Texas representatives (find yours at https://wrm.capitol.texas.gov/home) and Governor Greg Abbott's office. Share personal stories of hemp's benefits for wellness and spiritual awakening, emphasizing its non-intoxicating nature under federal farm bill guidelines. Sample message: "As a sovereign citizen, I urge you to oppose the unconstitutional smokable hemp ban, it restricts access to natural allies for consciousness expansion and violates inalienable rights." Advocate for amendments protecting THCA flower, without accusation—frame as a call for transparency and balance. Below are additional talking points regarding potential constitutional violations:

Why the Texas DSHS Smokable Hemp/THCA Ban May Be Unconstitutional

- **Separation of Powers Violation (Texas Constitution Art. II, §1)**: DSHS, an executive agency, is overstepping by creating policy that the Legislature rejected in 2025 (e.g., failed HB 1325 amendments). **Agencies enforce laws, not make them**, redefining THC to ban products contradicts statutory definitions (Health & Safety Code § 481.002(26)(F), which focuses on delta-9 only). This "ultra vires" (beyond authority) action mirrors past challenges, like the 2021 smokable hemp ban ruled unconstitutional by a Travis County judge for lacking rational basis.
- **Due Process and Vagueness (U.S. Constitution 14th Amendment; Texas Constitution Art. I, §19)**: Banning products based on "potential" THC (created during lab heating, not in the product as-is) is arbitrary and vague. THCA is not intoxicating. The Texas Forensic Science Commission has warned this method produces "false evidence," making enforcement unpredictable and unfair, products legal in raw form become illegal via simulation.
- **Equal Protection and Economic Rights (Texas Constitution Art. I, §3)**: The rules disproportionately burden small businesses with fee hikes (from $150 to $5,000 per location) while favoring monopolies or pharmaceuticals. This punitive impact, threatening 53,000 jobs and $260M in tax revenue, lacks a compelling

public interest, especially for non-intoxicating hemp compliant under federal law (2018 Farm Bill). Precedents like *Crown Distributing v. DSHS* (2023) enjoined similar overbroad rules.

Above all, forgiveness transmutes opposition; view these restrictions as mirrors for growth, not enemies. By acting in love/light, you neutralize distortions and accelerate the planetary shift toward fourth-density harmony. Hemp is but one tool, your true power lies in unity, gnosis, and the infinite field connecting all. Stand sovereign, empower your peers, and let this catalyst propel us toward a world of free energy, open disclosure, and uncalcified spirits.

We are all one. Act now, in peace and purpose. 🌿👁️✨

Adonai. So it is.

Christopher Charles Fagan
